

Avenger Display

Elite Display

EuroScales range of scales is the forklift truck scale that fits directly to any standard ITA / FEM forklift truck carriages.

The accuracy of 0.1% extends to this group of weighing attachments.

Using the latest leading edge Loadcell technology allows you to weigh at any height.

Whether you are picking something off the floor or high up in the racking all you have to do is make sure you have lifted it clear of any surrounding objects and the display will give you an accurate weight.

These scales are not affected by temperature changes as the loadcells are temperature compensated

Class 2

Dimensions: 900mm or 1100mm (A) width x 113mm (B) thickness

Weight: 900mm width – 207kg / 1100mm width 240kg

Class 3

Dimensions: 1100mm width (A) x 136mm (B) thickness

Weight: 1100mm width 350kg

Displays

N320 Display

Functions:-
 LCD Display with backlight
 Gross / Net weighing
 One touch tare and pre set digital tare
 RS232

N420 Display

Functions:-
 Large Multi Line LCD Display with backlight
 Gross / Net weighing
 One touch tare and pre set digital tare
 Alpha-Numeric Keyboard
 10 Memories
 RS232

Printers

Thermal Printer

Technical Specifications:-

2" / 50mm wide print
 Thermal paper
 N320 prints
 Time, date, gross, tare, net and sequence number

N420 prints
 Time, date, gross, tare, net and sequence number
 3 ID Numbers up to 8 digits long from 10 memories.

Operation

The driver picks up a load and lifts it until just past the reference height.
 He then lowers it gently to the reference point and stops there.
 The indicator calculates the weight and after approximately 3 seconds displays it fixed on the display.

Badentoy Business Park, Badentoy Crescent, Portlethen, Aberdeen, AB12 4YD.
